Bakers' Bread.

Bakers Bread.

The bakers' bread of today is not the bakers' bread of twenty years ago. Science and study has developed this food product more than any other manufactured article of consumption. The F. H. Traxel Company of this city is now the leading bread bakers of this section, simply because they have given study and close attention for years to making Bread that will please the public. Even now there is an impression that prevails among the few that bakers bread is unwholesome and unfit for family use. We will admit that there are many bakers who make their bread bakers bread is unwholesome and unft for family use. We will admit that there are many bakers who make their bread the same as their foreighters and years ago, and hence this impression is justifiable to those who never had an opportunity to get Bread made by bakers who thoroughly understand how to make Breadthat will be praised for its merits. The F. H. Traxel Co. has done its share to supply this section, enabling people to get Bread that will be praised will meet with every requirement. We make the assertion that this Bread will meet with every requirement. We make the assertion that this Bread will meet with every requirement because we have evidence of it, and the evidence is the irreasing demand wherever sold.
